## Special Projects

For over 30 years Grandeur has been delivering custom-designed building solutions to customers throughout Canada. Our solutions range from single-unit site offices to 250 person dormitories. Each building is built inside our controlled environment where weather conditions, on-site theft, and cost overruns should not affect your project. Grandeur has had experience working with various levels of government and different agencies in the public and private sectors. At Grandeur, we are confident that whether temporary or permanent, large or small, simple or complex, our products will meet your needs.

Our dedicated employees complete your project with professionalism and pride and are the foundation of our business. To discuss your special project or for more information on Grandeur's pricing and capabilities please contact the special project's division of Grandeur Housing.
